

9430IR - For use with night vision equipment

9430 LED  

The 9430 Remote Area Lighting System is the perfect unit for hard to reach places. At just 22 lbs., the 9430 is easily transported up stairs or ladders. Its compact size and fully extendable mast with 360 degree rotating light head make tight spaces easily accessible. Dual power outputs illuminate a second optional head making the 9430 an adaptable and expandable illumination solution. Solid state high efficiency circuitry withstands rigorous industrial use day in and day out.

9460 LED  

Using solid-state mounted LEDs coupled with a thermally efficient light engine and a Pelican Protector Case™, the RALS 9460 gives the user the ultimate maintenance-free portable floodlight station to get the job done efficiently, safely and on time. The RALS 9460 houses two light heads and a multi-stage universal charger for total self-contained convenience. It is also equipped with a telescopic handle and rugged wheels for ease of transport.

Select white light or red night vision mode for military use

9500 LED 

The 9500 Shelter Lighting System provides soldiers with safe, secure and silent LED interior shelter lighting in either red or white light. The system is extremely rugged and is tested to a 3 meter concrete drop-test, offering survivability not found in fluorescent lighting. Light heads are linked together and secured via hanging straps inside the temporary shelter/accommodation. The light output color (red or white) is selected via an inline switch and each light head can be independently switched on or off. The system is powered by the enclosed universal AC power supply or by an auxiliary 12-30 vdc power source such as the 9430 or 9460.

The Complete Kit includes 3 UV stable LED light heads, (3) 12' connector cables, hanging straps and power supply in a Pelican Protector™ Case.

9450B LED  

The 9450B Remote Area Lighting System combines our tough 1510 Case with 16 x 1 watt LEDs mounted in an aluminum heat sink. All items are stored inside the case and assemble in minutes. The aluminum pole extends to a height of 83" to provide 1280 lumens of light for any area. The diffuser (included) can be mounted to change the beam from a focused spot to a diffused beam. The 9450B is equipped with a telescopic handle and rugged wheels for ease of transport.

Features include a 12 volt auxiliary socket, battery status and charge indicator.

9470 LED  

The 9470 contains four heads that will illuminate 360 degrees using solid-state mounted LEDs coupled with a thermally efficient light engine. A rugged 1610 Pelican Protector Case™ houses all its light heads and a multi-stage universal charger for total self-contained convenience. The 9470 is equipped with a telescopic handle and rugged wheels for ease of transport.

9440 and 9445 LED  

The most innovative RALS units to date, the 9440 and safety approved 9445 move fast to light up ravines, confined spaces, riverbanks... anywhere your apparatus can't go. Deployed, the mast extends 7 feet high, shining light over low obstructions encountered by traditional lantern style lights. With a 120 degree beam spread and up to 2400 lumens, the entire emergency area will have the light you need for a safe and swift operation.

Both models are maintenance free, using super tough LED lamp modules and NiMH batteries for up to 14 hours of continuous light.
